

THE TOWNS OF DAVIDSON AND MOORESVILLE WANT TO LIMIT YOUR BOATING/RECREATION OPTIONS on Lake Davidson.

- This can negatively affect the value of your home.
- This means if your boat has > 10 HP, you cannot use it OR dock it on Lake Davidson.

We have been ***shocked*** to learn of this activity – as it wasn't put for public notice – at all – until there was a ground swell of rebellion from Lake Davidson lovers in November, 2007. As a result, a political action group (PLEASE@LKD) has formed to help guide the two towns' leaders as they continue to propose major changes to LKD.

If you have an interest in protecting your property's value, and in having a voice in the control of your property value, **please contact me.**

The mission of PLEASE@LKD (Preserve Lake's Environment Access Safety & Evolution) -is to interface with the Davidson & Mooresville Town leaders on behalf of LKD residents' & users. We don't have an agenda that is directed to any one group (skiers, kayakers, canoeists, swimmers, sunset-watchers, etc.). We want all people to have a voice in the evolution of LKD – not to have to just settle for what a group of politicians have dictated to us.

We have the following specific items in mind:

1. Preserving LKD's water quality and its shores' beauty
2. Preserving LKD's safety for recreation (boating, swimming, kayaking, etc.)
3. Providing access to LKD users, while preventing too much density
4. Providing guidance and cooperation to our towns' leaders for helping LKD evolve into the resource we'll love

The next meeting between the Towns regarding LKD is August 5, 2008 at 9 am at the Davidson Town Hall. We NEED the AFFECTED PROPERTY OWNERS & RESIDENTS to be active participants in any decisions affecting LKD's zoning, regulations, etc..... so please come to the meeting (wear a white shirt & sunglasses) **AND contact me** so you can get involved to have your voice heard!
